PROFILE

Flutter developer with experience building mobile apps for lab bookings, venue discovery and community services. Published the iconly_plus Flutter package and taught a 60-hour Flutter course at Princess Sumaya University for Technology.

TECHNICAL SKILLS

Flutter, Dart, BLoC/Cubit, GetX, MVVM, MVC, REST APIs, Dio, Retrofit, Firebase, Cloud Firestore, Supabase, Git and SQL.

PROFESSIONAL EXPERIENCE

Flutter Developer | Glimix Mar 2025 - Present

Work independently on assigned features in a freelance-style, task-based workflow. Build iOS and Android experiences for customers and businesses using the venue discovery app. Manage navigation and application state with GetX.

Integrated email, Google and Apple sign-in, push notifications and media uploads using Firebase.

Flutter Trainer | PSUT Sep 2026 - Oct 2026

Delivered a 60-hour Flutter course over six weeks for the Center of Consultation and Training at Princess Sumaya University for Technology. Guided students through building a shopping app with a product catalog and cart.

Taught state management with BLoC/Cubit, data storage with Cloud Firestore and REST API integration with Dio and Retrofit.

Flutter Developer | Rubix Consulting Nov 2025 - Aug 2026

Worked on Sulhafa alongside my role at Glimix. Built mobile features using BLoC/Cubit and integrated REST APIs with Dio and Retrofit.

Implemented Arabic and English localization, email sign-in and push notifications.

Oracle Technical Consultant | Macquires Feb 2024 - Feb 2025

Developed reports for finance, supply chain and HR teams using SQL and Oracle Fusion. Built dashboards in Visual Builder and customized screens using Page Composer.

Mohammad Al-Hajjeeh

SELECTED PROJECTS

Smart Labs
Freelance project

Built a Flutter app that lets users find laboratories in Jordan, view medical results and book home visits. Implemented guest access, SMS verification and secure local storage.

App Store Google Play

Sulhafa
Rubix Consulting

Developed a bilingual app for pet adoption, SOS requests and community interactions. Used MVVM to organize features and Flutter Secure Storage to protect local credentials.

App Store Google Play

Glimix
Glimix

Built customer and business experiences for a lifestyle and hospitality platform. Used Cloud Firestore to sync data and Firebase Storage to handle media.

App Store

Stylish E-Commerce
Masna3 Tech

Built a shopping app and its companion admin panel using Flutter, BLoC/Cubit, Firebase Authentication, Cloud Firestore and Supabase Storage.

Customer app on GitHub Admin panel on GitHub

OPEN SOURCE

iconly_plus
Flutter package

Published a Dart package that gives Flutter developers access to light, bold and broken Iconly icon styles and addresses legacy IconData conflicts.
